Good-Ark Semiconductor Conflict-Free Minerals Declaration

Good-Ark Semiconductor is a leading global discrete semiconductor manufacturer that offers a wide variety of surface mount, through-hole and wafer devices with superior quality and reliability at competitive costs. Good-Ark strives to conduct its operation based on the industry's highest quality and environmental standards.

Good-Ark Semiconductor is aware of violence and human rights violations in the mining of certain minerals from the Eastern region of Democratic Republic of Congo (DRC) and surrounding countries. The Electronic Industry Citizenship Coalition (EICC) and the Global e-Sustainability Initiative (GeSI) have requested that companies undertake reasonable due diligence with their supply chain to assure that specified metals are not being sourced from mines in the Conflict Regions.

Good-Ark Semiconductor fully supports the actions of the EICC and GeSI and declares that our products do not contain tin, tantalum, tungsten or gold that directly or indirectly finance or benefit armed groups in Democratic Republic of Congo (DRC) or adjoining countries.

Good-Ark Semiconductor is committed to ensuring conflict free sourcing of minerals from our supply chain and manufacturing facilities worldwide. Based on information we have gathered from all our suppliers and manufacturing facilities worldwide, Good-Ark does not use minerals from the conflict region. We will continue to monitor and update our information as necessary and remedy action will be taken promptly should situation arise against our Conflict-Free Minerals Policy.

If you have further questions regarding conflict minerals or product compliance, please contact Good-Ark Semiconductor at inquiry@goodarksemi.com.
